

## WATER SOLUBLE FERTILISERS

Standard Solufeed water soluble fertilisers for crops grown in soil and artificial growing media.  
All containing magnesium (Mg) and premium levels of trace elements.

- Solufeed water soluble fertilisers deliver the essential elements for crops to achieve their full potential
- Available in a wide range of NPK ratios to suit all crops and types of growing media.
- Produced from high quality raw materials and to rigid quality assurance standards of ISO 9001:2008
- Completely and readily soluble.
- Magnesium (Mg), vital for quality crop production, is incorporated.
- Premium levels of chelated micronutrients ensure stable solutions and availability to the plant.
- Standard formulations available ex-stock.

	Solufeed 1:1:1 20kg NPK 18:18:18+3MgO	• A good starter feed for balanced growth. Reliable for most crops and situations.	PRODUCT CODE 125.GB0173	
	Solufeed 4:1:2 20kg NPK 28:7:14+3MgO	• High Nitrogen (N) for vigorous vegetative growth.	PRODUCT CODE 125.GB0180	
	Solufeed 1:5:1 20kg NPK 10:52:10+3MgO	• High Phosphorus (P) to promote root growth and crop establishment.	PRODUCT CODE 125.GB0179	
	Solufeed 2:1:4 20kg NPK 15:7:32+3MgO	• High Potassium (K) finishing fertiliser for flowering and fruiting growth stages.	PRODUCT CODE 125.GB0172	
	Primrose & Pansy Special 20kg NPK 13:7:27+3MgO	• Promotes abundant flower formation together with healthy green leaves for optimum marketability. Contains FeDTPA to prevent iron deficiency.	PRODUCT CODE 125.GB0849	
	Solufeed TEC-SF 20kg	• Chelated trace elements and magnesium in a ratio suited to soft fruit production.	PRODUCT CODE 125.GB0174

## SOLUFEED CROP SPECIFIC FERTILISERS

A range of specially designed formulations to exactly match the needs of particular crops. Contain appropriate levels of magnesium (Mg) and trace elements.

www.solufeed.com

Strawberry Starter  
20kg NPK  
15:7:30+5MgO

- For use up to flowering.

### PRODUCT CODE

125.GB0190

Strawberry Special  
20kg NPK  
2:9:30+8MgO

- Low nitrogen (N) feed (where calcium nitrate or nitric acid provides The nitrogen) for strawberries growing in peat based media. Suitable for post harvest, Autumn applications.

### PRODUCT CODE

125.GB0165

Stout  
20kg NPK  
18:10:18+3MgO

- For outdoor, field grown strawberries without trace elements.

### PRODUCT CODE

125.GB0226

Blueberry Special  
20kg NPK  
12:10:11+4MgO

- Acid feed for blueberries growing in areas where the irrigation water is hard.

### PRODUCT CODE

125.GB0559

Solufeed  
Coir-TEC  
10kg

- Specially formulated for crops growing in coir-based growing media.

### PRODUCT CODE

125.GB0802

Solufeed  
20kg  
7:6:34

- High Potassium (K) formulation to promote flowering and subsequent fruit formation and development

### PRODUCT CODE

125.IE0004

## MADE-TO-ORDER FERTILISERS

Standard off-the-shelf products are supplemented by our rapid tailor-made fertiliser service – as unique and special as your crop.

Use our technical expertise to design, produce and deliver a fertiliser to suit your exact needs. Crop, water quality and other local conditions are all taken into account to ensure optimum performance and cost effectiveness.

- Precise NPK ratios
- Fertilisers with added calcium (Ca) and magnesium (Mg)
- Specific fully chelated micronutrient levels
- Acidifying fertilisers for hard/alkaline water
- Modest minimum order quantities

**For more details about these and other Solufeed products, please ask us for the latest Solufeed Product Guide or log onto [www.solufeed.com](http://www.solufeed.com)**

## SOLUFEED HYDROPONIC FERTILISERS

Solufeed H  
17.5kg  
NPK  
0:17:39

- Flexible hydroponic fertiliser for use in the "B" tank along with self sourced potassium nitrate ( $\text{KNO}_3$ ).

### PRODUCT CODE

125.GB0224

Solufeed F  
20kg  
NPK  
9:7:37

- The original complete, balanced NPK hydroponics fertiliser suitable for almost any crop.

### PRODUCT CODE

125.GB0189

Solufeed TEC  
10kg  
Trace Element Mixture

- Efficient balanced mixture of fully chelated trace elements. Particularly useful for Growers who prefer to mix their own Feeds Suitable for rockwool, NFT and other systems.

### PRODUCT CODE

125.GB0016

Trace Element  
Combi  
Solufeed B-Mix  
(LibrelTM BMX)

- For the correction of multiple trace element deficiencies in many crops.

### PRODUCT CODE

125.GB0860 (10 x 1kg)

## SOLUCOTE CONTROLLED RELEASE FERTILIZERS

Modern, resin-coated controlled release fertilisers for use in the production of a wide variety of ornamental plants. Solufeed Solucote is mixed with the growing medium when the crop is planted. The fertiliser is steadily released to provide all the nutrients needed by the crop throughout its life. Because the rate of release matches the crops' requirements there is little wastage.

Solucote provides a simple, reliable and cost effective way of feeding plants throughout their life.

Supplied in 10kg bags.

PRODUCT CODE	PRODUCT NAME	LONGEVITY	ANALYSIS	MAIN USE
125.GB0020	Solucote Short	3 month	15:7:15+2+TE	Pot & Bedding Plants, herbs, hanging baskets etc.
125.GB0022	Solucote Medium	6 month	15:7:15+2+TE	Nursery stock / Ornamentals
125.GB0023	Solucote Long	12 month	14:7:14+2+TE	Nursery stock

**For more details about these and other Solufeed products, please ask us for the latest Solufeed Product Guide or log onto [www.solufeed.com](http://www.solufeed.com)**

## SOLUFEED SUPERIOR FERTILISERS FOR HARD WATER

A new standard in soluble NPK fertilisers available from Solufeed. Suitable for hard water and in some cases, can eliminate the need for hazardous nitric acid. In soft water areas use together with calcium nitrate.

[www.solufeed.com](http://www.solufeed.com)

- Mostly nitrate nitrogen for immediate availability.
- Zero ureic nitrogen – suitable for all crops and growing media.
- Acidic formulation:
  - Will reduce water pH for growers with hard water (>150ppm HCO<sub>3</sub>).
  - Will mix with calcium nitrate for growers with soft water
- Rapidly and completely soluble.
- Fully chelated balanced mix of trace elements.
- Suitable for a wide range of crops from pot plants to soft fruit.
- Made exclusively by Solufeed using the unique Pekacid® raw material.

Superior Vigil  
20kg  
NPK  
16:10:18+2MgO

- Starter fertiliser. Also a balanced formulation suitable for a wide range of crops and conditions. Can be mixed with calcium (Ca) sources.

### PRODUCT CODE

125.GB0707

Superior Fleury  
20kg  
NPK  
14:10:28+2MgO

- Finishing fertiliser. Balanced to encourage flowers and fruit rather than vegetative growth. Can be mixed with calcium (Ca) sources.

### PRODUCT CODE

125.GB0706

## SPECIALITY 'STRAIGHTS'

High quality basic fertiliser materials used alone or in combination with Solufeed water soluble fertilisers to create specific feeds.

K-Leaf  
25kg  
NPK 0:0:50  
plus Sulphur

- A superior, premium quality highly water soluble potassium sulphate formulation that is better suited for use in modern agricultural / horticultural practices. A Solufeed exclusive.

### PRODUCT CODE

125.GB0866

Solupotasse™  
25kg  
NPK 0:0:50  
plus Sulphur

- The special extra-soluble grade of potassium sulphate for fertigation and foliar spray. Virtually chloride-free with a low salt index and containing sulphur in the plant-available sulphate form. Zero nitrogen, making it ideal for those crops (E.g. strawberries) which require little or no N towards the end of their growing cycle.

### PRODUCT CODE

125.GB0024

Calcium Nitrate  
25kg

- A soluble source of Calcium for all crops.

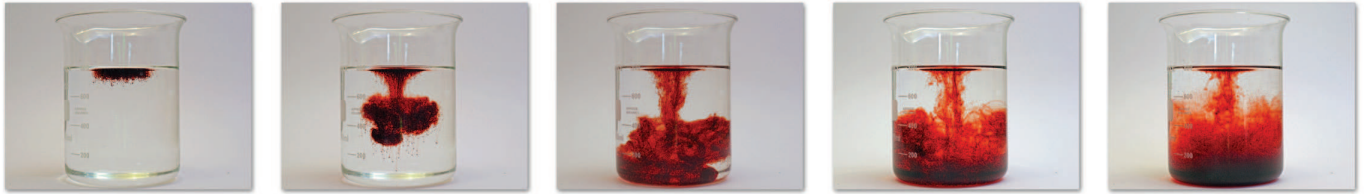

### PRODUCT CODE

125.RM0008

## SOLUFEED CHELATED MICRONUTRIENTS

Solufeed probably offers the widest range of chelated micronutrient fertilisers from any supplier, including virtually every type of iron chelate. In the UK and Ireland Solufeed represents BASF's micronutrition business unit enabling us to supply the Librel and LibFer brand of chelates if required.

*Photographs taken at 1 second intervals showing the superb solubility of Solufeed 6.0 EDDHA Extra even in the absence of agitation*

## THE SOLUFEED EDTA RANGE

Calcium  
Solufeed  
9.5% Ca EDTA  
(Librel™ Ca)

- Efficient calcium source where no effect on pH is desirable.

### PRODUCT CODE

125.GB0196 (10 x 1kg)

125.GB0032 (25kg)

Manganese  
Solufeed  
13% Mn EDTA  
(Librel™ Mn)

- For foliar application, fertigation and hydroponic solutions.

### PRODUCT CODE

125.GB0341 (10 x 1kg)

125.GB0039 (25kg)

Copper  
Solufeed  
14% Cu EDTA  
(Librel™ Cu)

- For foliar application, fertigation and hydroponic solutions.

### PRODUCT CODE

125.GB0827 (10 x 1kg)

125.GB0033 (25kg)

Zinc  
Solufeed  
14% Zn EDTA  
(Librel™ Zn)

- For foliar application, fertigation and hydroponic solutions.

### PRODUCT CODE

125.GB0163 (10 x 1kg)

125.GB0040 (25kg)

Iron  
Solufeed  
13.2% Fe EDTA  
(Librel™ Fe-Lo)

- For hydroponics and foliar application.

### PRODUCT CODE

125.GB0159 (10 x 1kg)

125.GB0035 (25kg)

Magnesium  
Solufeed  
5.5% Mg EDTA  
(Librel™ Mg)

- For foliar application or via fertigation systems.

### PRODUCT CODE

125.GB0887 (10 x 1kg)

125.GB0197 (25kg)

## THE SOLUFEED IRON CHELATE RANGE

Solufeed  
7.0% Fe DTPA  
(Librel™ Fe-DP)

- Microgranules, standard grade for Hydroponics and fertigation.

### PRODUCT CODE

125.GB1058 (10 x 1kg)

125.GB0036 (25kg)

Solufeed  
7.0% Fe EDDHA  
Regular  
(Librel™ Fe-Hi)

- Microgranules, economy grade for moderate soil conditions.

### PRODUCT CODE

125.GB0854 (10 x 1kg)

125.GB0154 (20kg)

Solufeed  
Rapid  
2% Fe EDDHSA

- Liquid formulation, for use in hydroponics and fertigation systems.

### PRODUCT CODE

125.GB0329 (1 Ltr)

125.GB0567 (20 Ltr)
