

## SINCLAIR Pro VERMICULITE MEDIUM

NEW

Vermiculite's laminar structure provides excellent exchange properties, helping compost hold on to soluble nutrients. Also ideal as a top dressing for seed sowing as it provides insulation for healthy seed germination.

### SINCLAIR Pro VERMICULITE MEDIUM 100L

- 2.0 – 5.0mm Graded for Horticultural Use
- Water Holding: 381ml/litre
- Use to improve:
  - Aeration
  - Water Management
  - Nutrient Retention & Exchange
  - Insulation Properties in growing media

CODE	UNITS PER PALLET
215.FXS1730Y	27

## SINCLAIR PERLITE STANDARD

NEW

Perlite's honeycomb internal cells help to improve aeration and insulates compost, reducing large temperature fluctuations. Can be used to replace sand or grit in potting composts and container composts for optimum aeration. Will give a well-drained environment in large containers, promoting healthy root growth.
