

Mini rolls of quality commercial grade products in display boxes, perfect for till ends and promotions.

HIGH QUALITY PERMATEX GROUND COVER 100gm - Mini Roll

- Unique ripple weave gives excellent water dispersion and eliminates puddling
- UV stabilisation for 5 years

CODE	WIDTH (Metres)	LENGTH (Metres)	BARCODE
179.GC1x10	1	10	2100000901005

Available in display box only - 36 rolls per box

BLACK MULCH GROUND COVER - Mini Roll

- A strong yet lightweight spun-bound weed mat
- Allows easy application
- Optimum water dispersion

CODE	WIDTH (Metres)	LENGTH (Metres)	BARCODE
179.MGC1x20	1	20	21001011357213

Available in display box only - 25 rolls per box

FLEECE (18g/m²) - Mini Roll

- Versatile all year weather protection
- Spun from filament of polypropylene
- Fleece is soft, warm, permeable, and translucent

CODE	WEIGHT	WIDTH (Metres)	LENGTH (Metres)	BARCODE
179.18FL1x20	18g/m2	1	20	2100101357213

Available in display box only - 62 rolls per box

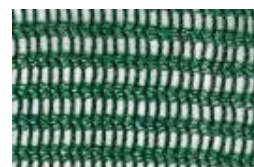

ROKOLENE GREEN SHELTER NET - Mini Roll

- Made from high density polyethylene tapes and super-strength monofilament to give superior performance in all climatic conditions.
- Tear proof, rot proof, resistant to sun, rain, ice, snow and pollutants and unlike grown barriers is pest and disease free. 50% Wind and Shade reduction; UV Stabilisation: 5 years
- Rokolene lowers moisture loss through transpiration; reduces leaves discoloration, wilting and burning and is ideal for daytime shading or night-time heat conservation.
- "Super-secure" easy-fix eyelets for ease of installation.

Blue Grid Ground Cover available on request

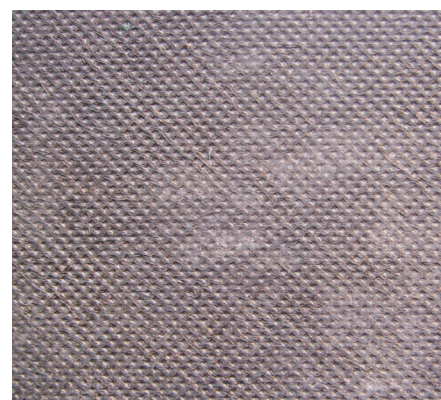

BLACK MULCH GROUND COVER

Black Mulch Ground Cover is produced in 50gsm spun-bonded polypropylene. It is ideal for landscaping and horticultural applications, as weed suppressant, soil and gravel separator or base for bark chippings. Crops such as strawberries may be planted through, ensuring the fruit does not touch the damp earth, thereby rotting.

Final determination of the suitability of the material is the sole responsibility of the user.

THERMAGRO FLEECE (18g/m²)

18g spun bonded fleece works like a protective duvet for plants, maintaining a temperate microclimate while protecting from frost, snow, hail, rain beat, slugs, snails and insects.

Thermagro can be used all year round to give an optimum protection, allowing for an earlier and maximised crop. Every roll has been individually UV treated and due to its unique construction, it has a high tension tear resistance and hence is very durable.

LUTRASIL FLEECE (30g/m² and 60g/m²)

- Provides winter covering for vegetable crops and ornamental plants
- Provides shade for herbaceous plants and tree nurseries
- Excellent durability, strength and tear resistance
- Consistent continuous fibres providing climate control whilst creating the best growth conditions for your horticultural crops
- Strong endless fibres providing high durability and strength in all directions
- A flexible crop covering resistant to high winds
- Protection climate barrier for all horticultural crops
- Excellent water permeability, limiting water retention held in the cross section of the non-woven thereby minimizing any damage to the crop below
- Optimum protection against pests
- Balanced temperature and humidity distribution

WINDBREAK NETTING

- Windbreak Nettings are knitted from tough monofilament thread.
- They are designed to maximize crop and plant protection against wind damage, by creating a less turbulent environment.
- The plants grow stronger, thanks to reduced physical damage and root rocking.
- They also reduce transpiration.
- 130g/m²
- 50% shade
