

- Protects Fingernails - Double Dipped Tips
- Breathable Liquid Resistant Coating
- Keeps Dirt Out - Lets Air In

The Tough Tips gardening gloves are brought to you by Gold Leaf Gloves, who produce the finest gardening gloves in the world. The RHS endorsed gloves range, is cheap on price but not on quality.

The gloves are designed to keep dirt and moisture out, but let air in. They have a breathable, liquid resistant coating covering the whole glove and the fingertips are double coated to help protect fingernails from dirt! They are a good lightweight glove ideal for everyday tasks such as gathering, weeding, and planting.

Available in three sizes: Small (pink), Medium (lilac), and Large (grey)

CODE	SIZE	COLOUR	BOX QTY	BARCODE
221.TTipS	Small	Pink	12	5060080270491

Order 144 pairs of TOUGH TIPS (48 Small, 48 Medium and 48 Large) to receive a **FREE** merchandising stand.

It takes up only 0.5 sq.metre of space, which is proven to generate valuable additional impulse purchase.

ERGONOMIC HAND SHOVEL

Save your wrists, dig towards you

Handigger uses Swedish ergonomic design to make planting easier and more comfortable. Ditch that cramping hand trowel and experience the joy of digging towards your body rather than away.

It makes planting a breeze. The Handigger's ergonomic design allows you to scoop soil towards you, rather than away, allowing for a more natural motion that won't leave your arm tired and your hand cramped. The wide scoop allows for greater excavation with each motion and is great for holding back soil while making room for a plant's root ball. The wide, smooth surface allows for easy levelling of soil once the plant is in the ground for ideal water distribution.

Handigger is light-weight, made with durable plastic and is extremely safe for even the tiniest gardeners to dig with. Don't forget to pack it with your bucket and umbrella when you head to the beach. The Handigger makes a great tool for building sandcastles too!

Handigger, a versatile tool

Planting bulbs / potatoes

Smoothing after planting

Planting

Scoop soil from the bag

Loosen up

Spreading fertiliser

Flatten, e.g. when planting in pots

Cutting edges between lawn and flower beds

Protecting the hand when working against a wall

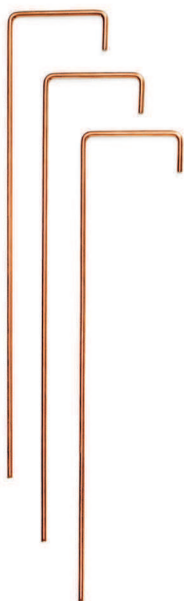

Cutting hard soil in flower beds when weeding
