TREE SUPPORT TIES

The tree support tie is designed to support and protect the tree when grown against any steel, nylon wire and non slip cord. The tie acts as a cushion and by the nature of the soft synthetic rubber material and design. Just lift upwards the hinged centre block, position the support wire underneath and into the two grooves either side. Bring the two straps round the tree and tighten EACH one, so the whole tie self grips. When the tie is tightened it self grips and does not slip along the wire or cord. The tree is held firmly and it does not suffer any damage to the bark. The tie is soft, strong, black and UV protected.
