

**TO CALCULATE THE SIZE OF POLYTHENE REQUIRED TO COVER YOUR TUNNEL**

**Sheet Sizes**

**To Calculate the Sheet LENGTH:**

Height from ridge to ground X 2 + 2m + Length of Structure = LENGTH

**To Calculate the Sheet WIDTH:**

Look at the options below to decide the width of sheet that is required.

**Trenching into the ground**

A to A i.e. ground to ground over the hoop, plus approx 2m extra (to line trenches)

**Attaching to Base Rail**

B to B i.e. ground to ground over the hoop, plus 1m extra to fit

**Attaching to Side Rail**

C to C ie, side rail to side rail over the hoop, plus 1m extra fit.
