

The Air-Pot system actively enhances the plant, by making it develop a mass of healthy fibrous roots. This maximises its ability to absorb nutrients and water, leading to a healthier, faster growing plant.

The ground-breaking design of the Air-Pot container has been continually refined over twenty years and is now in its sixth generation. Every detail has been enhanced to guarantee healthy root development and maximise aeration. Toughly constructed from recycled plastic Air-Pot containers can last up to ten years or more even in strong sunshine.

**Air-Pot system the only container to completely eliminate root circling and accelerate growth – by up to 60%.**

## AIR-POT® KITS

CODE	VOLUME LITRES	VOLUME GALLONS	FIXINGS PER UNIT	DIAMETER (MM)	LENGTH (MM)	HEIGHT (MM)	PACK SIZE
------	---------------	----------------	------------------	---------------	-------------	-------------	-----------

(The base is placed up the wall 15mm (1 row) )

107.Miscparts	1.0	0.3	1	100	490	145	50
---------------	-----	-----	---	-----	-----	-----	----

(The base is placed up the wall 60mm (3 row) reducing vol.)
