DETERGENT SANITISER – GALTEC SURESAN

SURESAN is a general purpose detergent sanitiser, which is specifically formulated to give an effective antimicrobial action against both gram negative and gram positive organisms, whilst also having other constituents to give a sanitising effect on hard surfaces such as brick walls, timber, plastered or painted walls. It is ideal for use in all operations where a cleaning and sanitising effect is required with one action - general cleaning, sanitising, odour control, and algae & slime control. It is approved for use in a food processing environment.
